

To whom it may concern.

It is my pleasure to recommend Lyubomir Matvienko as a blockchain developer. Lyu worked for me as a part of a team of two where he took point in developing a NFT marketplace on the Flow blockchain.

Lyu proved himself to be an exceptionally dependable employee when it came to getting himself involved with complicated, emerging technologies as well as having the programming fundamentals to assist other teams on the project when it came to integration and research.

Lyu takes his work seriously, and strives to come up with the best possible solution to any problem that comes his way. His ability to work well with others makes him a good addition to any team when it comes to the blockchain space.

Sincerely,

DocuSigned by:
